

### Amendments to the Claims

This listing of claims replaces all prior versions and listings of claims in the application.

### Listing of Claims

1-4. (Canceled).

5. (Previously Presented) A light emitting device comprising an organic light emitting element comprising:

a hole injecting layer comprising a first organic compound that serves as a hole injecting material in contact with an anode;

a hole transporting layer comprising a second organic compound that serves as a hole transporting material; and

a mixed region comprising the first organic compound and the second organic compound between the hole injecting layer and the hole transporting layer.

6. (Previously Presented) A light emitting device according to claim 5, wherein a concentration of the first organic compound in the mixed region declines toward the hole transporting layer from the hole injection layer.

7. (Previously Presented) A light emitting device comprising an organic light emitting element comprising:

a hole injecting layer comprising a first organic compound that serves as a hole injecting material in contact with an anode;

a hole transporting layer comprising a second organic compound that serves as a hole transporting material; and

a mixed layer comprising the first organic compound and the second organic compound between the hole injecting layer and the hole transporting layer.

8. (Original) A light emitting device according to claim 7, wherein a concentration of the first organic compound in the mixed layer declines toward the hole transporting layer from the hole injection layer.

9. (Previously Presented) A light emitting device comprising an organic light emitting element comprising:

- an electron injecting layer comprising a first organic compound that serves as an electron injecting material in contact with a cathode;

- an electron transporting layer comprising a second organic compound that serves as an electron transporting material; and

- a mixed region comprising the first organic compound and the second organic compound between the electron injecting layer and the electron transporting layer.

10. (Previously Presented) A light emitting device according to claim 9, wherein a concentration of the first organic compound in the mixed region declines toward the electron transporting layer from the electron injecting layer.

11. (Previously Presented) A light emitting device comprising an organic light emitting element comprising:

- an electron injecting layer comprising a first organic compound that serves as an electron injecting material in contact with a cathode;

- an electron transporting layer comprising a second organic compound that serves as an electron transporting material; and

- a mixed layer comprising the first organic compound and the second organic compound between the electron injecting layer and the electron transporting layer.

12. (Original) A light emitting device according to claim 11, wherein a concentration of the first organic compound in the mixed layer declines toward the electron transporting layer from the electron injecting layer.

13-30. (Canceled).

31. (Original) A light emitting device according to claim 5, wherein the organic light emitting element emits light from a triplet excitation state.

32. (Original) A light emitting device according to claim 7, wherein the organic light emitting element emits light from a triplet excitation state.

33. (Original) A light emitting device according to claim 9, wherein the organic light emitting element emits light from a triplet excitation state.

34. (Original) A light emitting device according to claim 11, wherein the organic light emitting element emits light from a triplet excitation state.

35-42. (Canceled).

43. (Original) An electronic appliance comprising a light emitting device according to claim 5.

44. (Original) An electronic appliance comprising a light emitting device according to claim 7.

45. (Original) An electronic appliance comprising a light emitting device according to claim 9.

Applicant : Satoshi Seo et al.  
Serial No. : 10/024,699

Attorney's Docket No.: 12732-088001 / US5398/5543

46. (Original) An electronic appliance comprising a light emitting device according to claim 11.

47-104. (Canceled).
